

Case 360 : Narrative

Case Vehicle (A): 2000 Dodge
Type: Stratus, 4-door sedan
Driver: 46-year-old female
CDC: 12-FLEW-3

SITUATION

[1](#) [2](#) On a very snowy night, case vehicle (A) was traveling south on a two-lane dirt road in a rural area, at a driver-estimated speed of 25 mph (40 kph). The roads were snow-covered and it was dark and unlighted. The posted speed limit was 35 mph (56 kph). [3](#) As case vehicle (A) was coming down a negative grade and [4](#) entering a sharp curve to the left, the driver of case vehicle (A) lost control of the vehicle due to the slippery road conditions. She applied the brakes, but the vehicle skidded on the snow-covered road. [5](#) [6](#) [7](#) The vehicle departed the right edge of the road and [8](#) [9](#) the front of the vehicle struck a 50-cm diameter tree located 14-m south of the road edge. The vehicle was towed from the scene due to damage. The police reported B-level injuries for the driver, who was transported to a trauma center by ambulance. The driver tested positive for opiate drugs and had a blood alcohol level of .129 percent.

GENERAL VEHICLE DAMAGE AND ESTIMATED CRASH SEVERITIES

[10](#) The direct damage to the front of case vehicle (A) from impact with the tree was primarily to the left portion of the front bumper. [11](#) The damage began at the left-front bumper corner and extended 50 cm to the right, resulting in 35-percent vehicle overlap. The maximum crush of 60 cm occurred to the right of the left-front bumper corner.

Using the WinSMASH crash-reconstruction program and c-values measured for [12](#) [13](#) [14](#) [15](#) [16](#) [17](#) case vehicle (A), the following impact severity was calculated for the frontal impact with the tree.

		Calculated Velocity Change - kph (mph)		
Vehicle	Variable	Total	Longitudinal	Latitudinal
Case Vehicle (A)	delta V	37 (23)	-37 (-23)	0 (0)

DESCRIPTION OF DAMAGE TO CASE VEHICLE (A)

Exterior

[18](#) The left portion of the front bumper was crushed rearward into the engine compartment, [19](#) the grille was damaged, and both headlight assemblies were broken. [20](#) The hood was crushed and pushed up and to the rear, the hood latch was damaged and jammed, both hood hinges were deformed but not separated, and the rear edge of the hood was elevated. [21](#) [22](#) Deformation to the cowl caused cracks in the lower-center portion of the windshield that radiated up into the right side of the glass, [23](#) and the left-rear edge of the hood contacted and cracked the lower-left portion of the windshield, with cracks radiating along the upper portion of the left A-pillar.

[24](#) On the left side, the fender was deformed and pulled in. [25](#) The left-front axle was damaged and the wheel was pushed to the rear, causing the left wheelbase to be reduced 14 cm. [26](#) There was no damage to the upper or lower portions of the left A-, B- or C-pillars, the left-side doors were undamaged and operational, and there was no left-side glazing damage. [27](#) There was also no damage to the left-rear wheel or [28](#) to the left quarter panel.

29 On the right side, the fender was deformed and pulled in. 30 31 There was no damage to the right-side wheels but the right wheelbase was increased 5 cm. 32 There was no damage to the upper or lower portions of the right A-, B- or C-pillars, the right-side doors were undamaged and operational, and there was no right-side glazing damage. 33 There was also no damage to the right quarter panel.

34 There was no damage to the rear of case vehicle (A).

Interior

35 This vehicle was equipped with steering-wheel and dash-mounted frontal-impact airbags, which deployed during the frontal impact with the tree. 36 There was dirt on the upper portion of the left half of the steering-wheel airbag fabric, but there was no evidence of driver contact. 37 38 There was also a black patch of melted airbag fabric on the right-rear portion of the airbag. 39 40 The upper half of the steering-wheel rim was deflected forward approximately 3 cm, 41 and the top half of the airbag module cover was displaced forward and stuck behind the upper portion of the steering-wheel rim. 42 There was no rotation of the steering column. 43 There was no damage to the roof, to the roof headliner, or to the upper portion of the left A-pillar. 44 45 There was no damage to the driver sunvisor, but there was a scuffmark on the left-front corner of the visor. 46 There was no damage to the upper or mid portions of the instrument panel, but 47 48 the knee bolster was dented and pushed forward, and there were scuffmarks just below and to the left of the steering column. 49 The driver section of the floor was displaced up, the toepan was displaced to the rear 50, and the brake and accelerator pedals were bent slightly to the left. 51 There was no damage to the interior panel of the driver door.

52 There was no damage to the center section of the roof, to the windshield header, or to the rearview mirror, but the center section of the windshield was cracked. 53 The plastic cover over the center console was displaced and 54 the cover over the transmission selector was separated from the center floor console.

[55](#) In the right-front seating area, there was no damage to the roof, to the windshield header, or to the right A-pillar. [56](#) The glove compartment was damaged and [57](#) the glove-box door would not close. [58](#) There was no damage to the dash-mounted frontal-impact airbag and [59](#) there was no damage to the right-front section of the floor.

[60](#) [61](#) The following intrusions were noted and measured:

Location	Component	Distance (cm)	Direction
left front	toepan	20	to rear
	floor	13	up
	kickpanel	5	to right

OCCUPANT KINEMATICS AND INJURIES

[62](#) The 5-ft, 7-in, 150-lb, 46-year-old female driver was wearing the available three-point belt, [63](#) and the steering-wheel airbag deployed during the frontal impact with the tree.

[64](#) The shoulder-belt anchor point on the B-pillar was adjusted to the lowest position. [65](#)

[66](#) [67](#) Belt use at the time of the crash is indicated by belt-loading marks on the D-ring, loading marks on the shoulder-belt webbing, and [68](#) [69](#) belt-loading marks on the continuous loop of the latch plate. The driver reportedly had adjusted the seat to a mid-to-forward seat position and was braking with her right foot prior to the crash.

During the frontal impact, the female driver moved forward relative to the vehicle interior, into the belt restraint and airbag. [70](#) She sustained a fracture to the right femoral head with right hip dislocation from knee contact with the knee bolster, [71](#) as evidenced by scuffmarks on the center portion of the knee bolster just below the steering column. She sustained an abrasion to the medial aspect of the right knee, probably from contact with the steering-wheel tilt lever, and an abrasion to the lateral aspect of the left knee, [72](#) probably from contact with the knee bolster, as evidenced by scuffmarks on the left portion of the bolster.

The following table and attached drawing [73](#) summarize the injuries for the restrained driver.

Occupant: Driver	Age: 46 years	Gender: Female																
Restraints: 3-point belt, steering-wheel airbag	Stature: 170 cm (5 ft, 7 in)	Mass: 68 kg (150 lb)

CASE NO.: 360-03

CASE VEHICLE: 2000 Dodge

TYPE: Stratus, 4-door sedan

OCCUPANT: (Driver) 46-year-old female

STATURE: 170 cm (5 ft, 7 in)

MASS: 68 kg (150 lb)

RESTRAINTS: 3-point belt, steering-wheel airbag

SEVERITY: MAIS - 3 ISS - 10

Case No.: 360-03
Case Veh. (A): 2000 Dodge
Type: Stratus, 4-door sedan
Driver: 46-year-old female

Weather: Heavy snow
Road Surface: Snow
Road Construction: Dirt
Light Conditions: Dark/unlighted
